SINSINA INDUSTRIAL WORKS

SIW Admin Guide

A simple, step-by-step guide to updating website words, pictures, cards, and page details. You do not need to know how to code.

Your changes are not published until you choose “Save changes”.

For the person who manages the SIW website content.

1. Start here

Open the admin page

Use the SIW admin page address provided by your company. Enter your administrator password and choose **Open CMS**. If the page says this is the first setup, create the first password and keep it private. If you cannot sign in, ask your website support person for help.

Find your way around

- **Left side:** choose a page, open Media library, or sign out.
- **Middle:** preview the selected page. Click a word or image to select it.
- **Right side:** edit the selected item, manage cards/lists, and update page details.
- **Top:** Save changes publishes. Reset page removes saved edits from the selected page.

The pages are Home, About Us, Brochure, Career, Certifications, Clients, News, Products, Services, and Team.

> **Before switching pages:** save first. Unsaved changes can be lost when you choose another page or close the admin page.

> **Easy rule:** Apply to preview lets you check a change. Save changes publishes it on the website.

2. Change words, pictures, or links

1. Choose the correct website page on the left.
2. Click the text or picture in the middle preview. Or choose an item from **This page's fields** on the right.
3. Change the matching field on the right. For words, use **Selected text**. For a picture or link, use its URL field.
4. Choose **Apply to preview** and check how it looks.
5. If it looks right, choose **Save changes** at the top. Wait for the **Changes saved** message.

To replace a picture

Open **Media library**, upload the new picture, and choose **Copy URL**. Close the library, select the picture you want to replace, paste the copied address into **Image URL**, then choose **Apply to preview** and **Save changes**.

Alt text is a short description of a picture for people who use screen readers. A link URL is the address a visitor opens by clicking.

Small design changes

The right side also offers font, size, weight, alignment, color, and case. If you are unsure, leave these as they are. Check the page preview before saving.

3. Cards, lists, and page details

Add or change a card

Some pages have a list of products, clients, news, career roles, team members, certifications, or services.

1. Choose **+ Add** for a new card, or choose a card in the list to edit it.
2. Fill in the title, description, picture, and link details that apply.
3. Choose **Save item** to update the preview.
4. Use the up/down arrows to reorder cards. Use the delete control to remove one.
5. Check the page, then choose **Save changes** at the top to publish.

> Removing a card is published when you save the page. Check carefully before publishing.

Page title and description

The **SEO** area is near the bottom on the right. **Browser title** appears in a browser tab and may appear in search results. **Meta description** is a short page summary that may appear in search results. Use clear, accurate wording and choose **Save changes**.

4. Media and important safety

Upload a picture or video

1. Choose **Media library** on the left.
2. Select a file and choose **Upload**.
3. When the file appears, choose **Copy URL**. Paste this address into an image field when replacing a picture.

Supported pictures: JPG, PNG, GIF, WebP, and AVIF. Supported videos: MP4, WebM, and MOV. Maximum file size: 100 MB.

> **Deleting a media file is immediate and cannot be undone.** Do not delete a file if it may be used on a website page.

Reset page

This removes **all saved CMS edits** for the page you currently selected, including its text, cards/lists, and SEO details. The page returns to its original website content. It does not undo just the last change. If you are unsure, do not reset; ask your website support person.

If you need help

- If a change is missing, check that you chose **Apply to preview**, then **Save changes**, and saw the success message.
- If saving or uploading shows an error, note the message and contact website support.
- If you see a different screen with **Preview Data** or a message that saving can be connected later, it is a demonstration form, not the publishing editor. Return to the SIW CMS page or contact support.

When you finish, choose **Sign out** on the left.
